M TO S ADAPTER BRACKET (DUAL) White or Black INSTRUCTIONS

Installation Tools:

- 3/4" Socket With Ratchet
- 3/4" Wrench
- Marine Grade Sealant

Hardware:

A (2) M to S Adapter bracket

INSTALLATION

STEP 1: Properly support your outboard motor according to the guidelines in your engine's owner's manual.

CAUTION: Install M to S Adapter Brackets one side at a time.

NOTE: Brackets may be installed onto either the transom or onto a jack plate. See attached images for more details.

STEP 2: Starting with one side (Port or Starboard), completely remove the bolts that attach the outboard motor to the transom/jack plate. Next, loosen the bolts where the other bracket will be installed on the opposite side about $\frac{3}{4}$ ".

STEP 3: Put a below waterline grade sealant around each transom bolt hole. Install the M to S Adapter Bracket in between the outboard motor and transom/jack plate on the side where bolts have been completely removed. Re-Install Bolts.

NOTE: Be sure not to fully tighten bolts until the other adapter bracket has been installed on the opposite side.
