Congratulations on your purchase of a Wireless Dash Switch featuring state-of-the-art C-Monster Control System technology.

**Programming Instructions**

1. Press and hold the PROGRAM button on the top of the unit for 3 seconds until the LED turns green (HPU will also beep). The unit is now ready to be paired with the wireless dash switch.

   **NOTE:** If dual units are installed, repeat Steps 1-3 to pair multiple units to a single wireless dash switch. Up to ten (10) wireless controllers can be programmed to each unit.

2. Press the UP button on wireless dash switch for one second and release. The green LED on the unit(s) will initially turn off, then flash steadily (HPU will also beep) indicating that the pairing is complete.

3. The surface mount switch is now paired to the unit. Test by following the operating instructions to ensure that the pairing procedure was completed successfully.

Operating Instructions

Using Speed Control
1. The dash switch has three speed settings (slow, medium, & fast). Depressing and releasing the “speed” button on the dash switch will toggle through the three settings. FIG. 1
2. The LED lights on the switch will flash back and forth at a speed corresponding to either a slow, medium, or fast setting.

Dual Power-Pole Operation
1. With dual Power-Pole shallow water anchors installed, the dash switch can also be used to toggle between independent or simultaneous control of the anchors. Depressing and releasing the “directional” button on the dash switch will toggle through the three settings (port side only, starboard side only, or simultaneous control). FIG. 2, 3, 4 and 5
2. The LED will flash either port side only, starboard side only, or on both sides to indicate the current control settings.

3. To raise or lower the Power-Pole shallow water anchor, press and hold either the “up” or “down” button on the dash switch. The anchor will only continue to move so long as you keep the button depressed.
4. Auto Mode: Double tapping (depressing and releasing 2 times within 1 second) either the “up” or the “down” button on the dash switch will cause the anchor to retract or deploy automatically. The Power-Pole shallow water anchor will continue to move in said direction until it either retracts completely or senses the bottom.
5. Sleep Mode: Press both buttons for 3 seconds, LED lights will flash indicating the switch is now in Sleep Mode. To reactivate, press both buttons again for 3 seconds until LED lights flash.

Installation Instructions

Changing The Battery
1. Remove the (2) #8 x 3/4” flat head screws from the top of dash switch.
2. Ensure the surrounding area is as dry and possible and avoid any moisture intrusion.
3. Use a small slotted screwdriver to remove the dash switch cover plate. FIG. 1
4. Remove the rubber switch membrane and the board from the dash switch base.
5. Remove the battery from the holder on the back of the board and replace with any CR2032 3V Lithium Coin Battery.
6. Place the board and rubber switch membrane back into the dash switch base and ensure that the rubber switch membrane is seated properly prior to installing the cover plate. FIG. 2
