## Spacer for Side Mount Adapter Plate

(For BMS Jack Plates)

### INCLUDED HARDWARE:

**A** (1) Spacer

### INSTALLATION TOOLS:

- 3/4" Socket with Ratchet
- 3/4" Wrench

**STEP 1** Locate the pre-drilled holes underneath the Decal Stickers **FIG. 1** If holes are found, skip to **STEP 4**.

If you are unable to find the pre-drilled holes, use the Drill Measurement Guide (Bob's Machine Shop) in the Side Mount Adapter Plate Bolt Set Instructions.

**STEP 2** Check on the inside of the Jack Plate where holes are being drilled for any obstructions or clearance issues when installing hardware.

**NOTE:** Bolts and Hardware are not included with **Spacer (A)**.

**STEP 3** Drill a 1/2" hole into each of the marked hole locations.

**STEP 4** Place **Spacer (A)** over the recessed area, aligning the holes in **Spacer (A)** with those in the Jack Plate.

**IMPORTANT! For some Jack Plate models, Spacer (A) will SPAN, NOT FIT INTO the recessed area.**

**STEP 5** Finish by following the Side Mount Adapter Plate Bolt Set instructions specific to your Jack Plate.

**NOTE:** JL Marine Systems, Inc. recommends that adapter plates be installed by an authorized Power-Pole® dealer. To find a dealer near you go to **power-pole.com**
