WARNING: To reduce the risk of injury, please read all installation instructions.

MICRO Battery Pak with Charger

Included hardware:
A. (1) Right battery bracket (pre-assembled)
B. (1) Left battery bracket (pre-assembled)
C. (2) Adapter bolts 2.75” (pre-assembled)
D. (1) 5/32 Allen key
E. (1) AC Wall Adapter
F. (1) Battery charger
G. (1) Battery Pak
**Battery Bracket Installation Instructions**
Slide the battery bracket onto the MICRO Driver Unit (Fig. 1). Tighten the bolts with the Allen Key (D) (Fig. 2).

*IMPORTANT:* Tighten the bolts until the bracket does not move.

**Attaching / Removing the Battery Pak**
Push the Battery Pak into the battery bracket until it snaps into position (Fig. 3).

*IMPORTANT:* The Battery Pak should not move when attached correctly. To remove, press in on both sides of the Battery Pak to disengage the tabs. (Fig. 4)

---

**CHARGING**

**Charging the Micro Battery Pak**
Plug the wall unit into a 110 Volt AC power source and then connect to supplied battery charger and Battery Pak.

**User Information:** The Micro Battery Pak delivers up to 100 full deployment/retractions cycles per charge.

**Battery charger indicator lights**
- **ORANGE LED** “Battery charging”
- **GREEN LED** “Battery Pak charged”
- **BLUE LED** “Battery Pak Charger plugged into power source and charger is ready”
GENERAL GUIDELINES AND WARNINGS:

• Read all warning labels before using the Battery Pak.

• Perform a full battery charge before use. For best results always charge at room temperature. Never charge near open flames or in direct sunlight.

• Use supplied Micro Battery Pak Charger only. Do not use any other charger. Failure to do so may cause a fire, which may result in personal injury and property damage.

• Your battery is electronically protected against over current, under and overvoltage, and under and over temperature. However, lithium batteries carry a risk of fire and burns. DO NOT open, crush, puncture, cool below 32°F Min or heat above 140°F Max, incinerate, or attempt to connect to battery contacts.

• Remove Battery Pak from Micro Driver Unit when not in use, storing, or prior to removal of Micro unit from boat.

• For longest battery life, store Battery Pak at or near a 50% charge at 32°F Min, 76°F Max. For long-term storage keep temperature as close to 32°F as possible.

• The Battery Pak comes with dielectric grease pre-applied into the connection area and should be re-applied every six months to ensure a corrosion-free connection.

• The Micro Battery Pak meets UN38.3 Transportation Shipping regulations.

CAUTION:
Do not use the Power-Pole shallow water anchor as your primary anchorage. Never leave your boat unattended while anchored solely with the Power-Pole shallow water anchor.
